SUMMARY

Data Science, AI & Data Engineering enthusiast with **hands-on internship experience in analytics, machine learning, and production data engineering**. Proficient in **Python, SQL, Power BI, and Excel**, with a strong foundation in data preprocessing, feature engineering, **model development, ETL pipelines, and exploratory data analysis**. Experienced in building scalable data solutions and analytics workflows, with growing expertise in **Deep Learning, NLP, Generative AI, Large Language Models (LLMs), Prompt Engineering, and Retrieval-Augmented Generation (RAG)**. Passionate about developing intelligent, production-ready AI solutions that solve real-world business problems.

TECHNICAL SKILLS

Programming & Analysis: Python, Scikit-learn, SQL, MySQL, PostgreSQL, ClickHouse

Data Science & Machine Learning: EDA, Data Preprocessing, Feature Engineering, Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Model Evaluation, Handling Imbalanced Data (SMOTE)

Deep Learning, NLP & Generative AI: Neural Networks, TensorFlow, Keras, Natural Language Processing (NLP), NLTK, Text Preprocessing, Tokenization, Vectorization, PyTorch, Prompt Engineering, Large Language Models (LLMs), RAG, Agentic AI

Business Intelligence & Visualization: Power BI, Tableau, Data Visualization, KPI Reporting, Matplotlib, Seaborn

Tools & Platforms: FastAPI, REST APIs, Postman, Git, Docker, DBeaver, Advanced Excel, Microsoft Azure, Snowflake, AWS

Certifications: Complete Data Science, Machine Learning, DL & NLP Bootcamp – [Udemy](#) | Complete Data Analyst Bootcamp – [Udemy](#) | The Ultimate Job-Ready Data Science Course – Code with Harry

WORK EXPERIENCE

Software Engineer Intern - Data Engineering | mFilterIt (On-Site)

June 2026 - Present

- Built **Python and SQL data pipelines** to ingest, clean, transform, and validate large-scale datasets, developing **automated ETL workflows** that improved data quality, streamlined reporting, and reduced manual effort.
- Contributed to the migration of data pipelines and SQL workloads from **MySQL to ClickHouse**, optimizing query performance and enabling efficient processing of high-volume analytical data.
- Performed **API testing and production pipeline validation** using **FastAPI** and **Postman** on live dashboards processing **1M+ records**, ensuring data accuracy, reliability, and production readiness.

Business Analyst Intern | mFilterit (On-Site)

Jan 2026 – June 2026

- Analyzed and visualized business data using **SQL, Python, Excel, and Power BI**, collaborating with cross-functional and international (US & Italy) clients to **deliver data-driven reports, dashboards, KPI tracking, and actionable business insights** for informed decision-making.

Data Analyst Intern | Finn Fintech (Hybrid)

Sep 2025 – Nov 2025

- Performed **Exploratory data analysis** on sales data to highlight factors impacting overall business performance.
- Developed **sales tracking** metrics and **dashboards** to support monthly performance reviews and internal reporting.

PROJECTS

InsightAI - From Raw Data to Intelligent Decisions | Python, FastAPI, Machine Learning, MLflow, LLMs, GenAI | [Github](#)

- Built an end-to-end **AI, Machine Learning, and Data Science platform** to transform raw data into intelligent decisions through **automated** EDA, data preprocessing, feature engineering, predictive modeling, forecasting, explainable AI (SHAP), model comparison, experiment tracking (MLflow), and interactive analytics.
- Developed an **LLM-powered AI Copilot** using **Qwen, Ollama, Retrieval-Augmented Generation (RAG)**, and **ChromaDB** for conversational dataset analysis, AI-generated business insights, automated report generation, natural language querying, and model interpretation through a modular FastAPI backend.

AI Pharma Decision System | Machine learning, NLP, Deep Learning, Python | [Github](#)

- Built a **4-layer AI-driven decision intelligence system** integrating **NLP, Machine Learning, Deep Learning**, and a rule-based **Decision Engine** to perform **sentiment analysis, side-effect extraction, demand prediction, and clinical trial success prediction** using structured and unstructured pharmaceutical data.
- Developed an interactive **Streamlit dashboard** delivering **real-time analytics, predictive insights, risk assessment, and data-driven business recommendations** for drug performance and decision support..

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering (Data Science)

2023 – 2027

Bhagwan Parshuram Institute of Technology, GGSIPU, Rohini, Delhi – 110089

CGPA : 9.10
